

Purpose of the webinar

The European ITS Platform serves as Technical ITS Knowledge Management Center to National Road Authorities and Road Operators partnering in the EU EIP community, to the European Commission in their roles as funding and regulatory institution as well as to stakeholders and multi-stakeholder collaborations engaged in preparing C-ITS deployment. EU EIP aims at ensuring regular operation of ITS services deployed today on the TEN-T core network of roads and, looking forward, at the best integration of C-ITS pilots and deployments with current ITS. EU EIP collaborates closely with C-Roads for the mutual benefit of both platforms. EU EIP (2016-2021) approaches the end of the action. It is time to wrap up, to take stock of the C-ITS related achievements and to recommend continued as well as further actions which aim at ensuring that C-ITS is properly integrated into road operators' day-to-day business but also providing a perspective beyond the C-ITS Day One applications. All output is accessible from the achievements folder on the EU EIP website (<https://www.its-platform.eu/achievement/integrating-c-its-into-road-operators-day-to-day-business>).

Webinar program (05/11/2021, 11:00 – 12:30 CET)

Topics	Contributors
Welcome and Introduction	Roberto Arditi, SINA Scientific Coordinator – ASTM Group, Victoire Champenois, EC DG MOVE
C-ITS Achievements	Farzin Godarzi, BAST
Integration into road operators' business	Paul Wadsworth, Capita, Axel Burkert, LBD BY
C-ITS as part of the Reference Handbook	Orestis Giamarelos, BAST
C-ITS quality package validation	Peter Lubrich, BAST
Lessons learned from piloting C-ITS services	Marek Šcerba, VSB
Ecosystem for fully operational C-ITS service delivery	Martin Böhm, AustriaTech
Looking ahead: roadmap beyond initial deployment	Carlos Viktorsson, Sweco
Discussion	Questions to contributors can be sent in advance
Wrap up and closing remarks	Victoire Champenois, EC DG MOVE, Roberto Arditi, SINA Scientific Coordinator – ASTM Group
