Major

Missing Truck Parking Spaces: The challenge remains

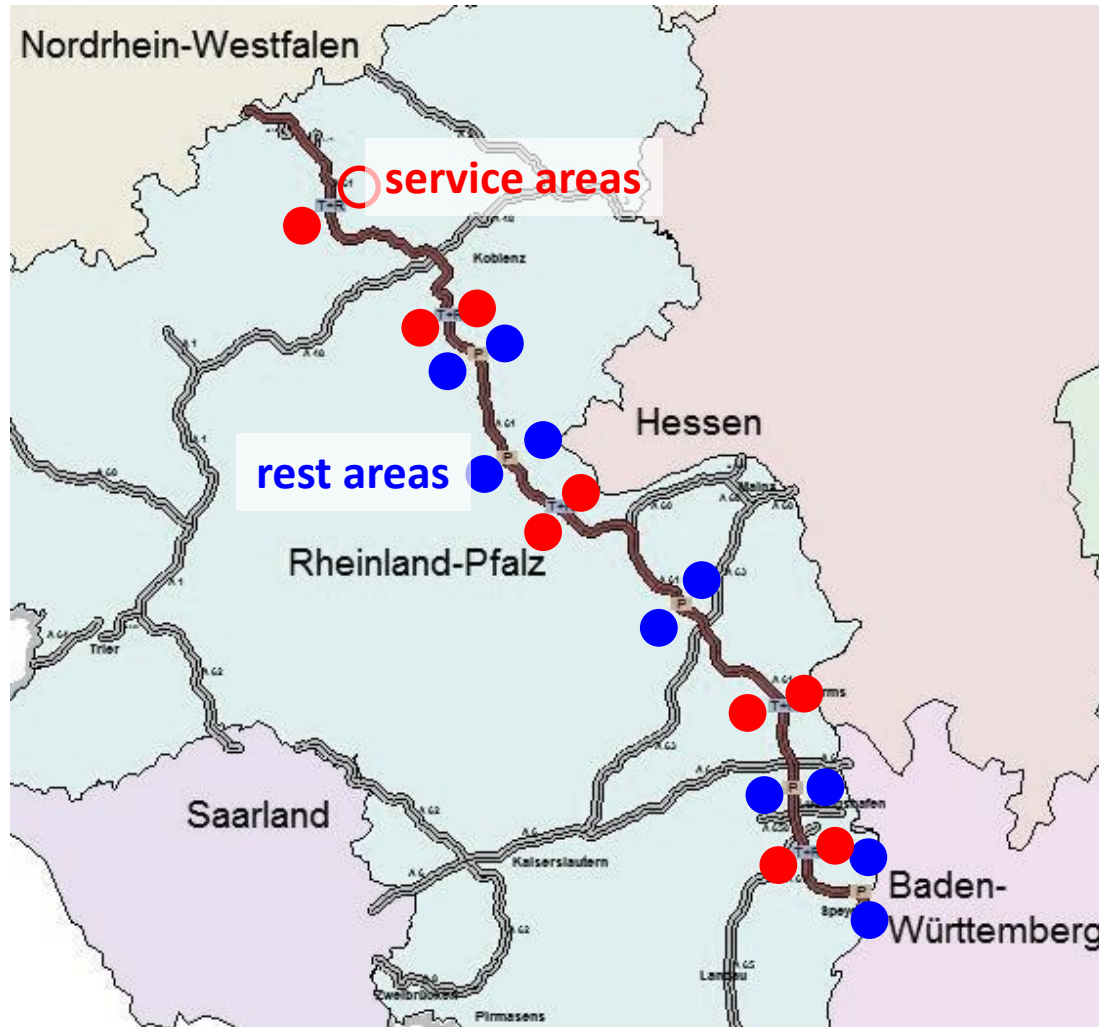

2008

Ref.: BASt

2013

Truck Parking Guidance System: A61 is the motorway backbone in Rheinland-Pfalz

General Framework

- ▶ Call for tender planned for June 2015 – two lots: service areas and rest areas
- ▶ Method: Counting ins and outs (CIAO)
- ▶ Functional description aiming at accuracy per area
- ▶ Accuracy is regarded as a function of the number of parking spaces
- ▶ Calibration once a week for 15 min per rest area supported by IP-cams
- ▶ Tenderer provides proves of quality (reference projects or demonstration)
- ▶ Publication and provision based on Datex II
- ▶ Software will be integrated into the so-called “Basissystem VRZ” (German open source software for TCC, currently used by 8 Länder)
