Activity Monitoring and Harmonisation of Single Point of Access

The ***objectives***

- Monitor development of NAPs across Europe.
- Harmonise the approach towards NAPs in Europe
- Facilitate exchange of knowledge between Member States
- Activity runs till end 2018

11 Member States are involved

Country	Member States - Organisation
NL (Lead)	Rijkswaterstaat
PT (Active)	IMT / Infraestruturas de Portugal
RO (Active)	ITS Romania, RNCMR
DE (Active)	BASt
UK (Active)	Transport Scotland, Highways England
FR (Active)	Centre d'études et d'expertise sur les risques, l'environnement, la mobilité et l'aménagement (CEREMA)
SE (Participant)	Trafikverket
FI (Participant)	Finnish Transport Agency (FTA)
FI (Participant)	Finnish Transport Safety Agency (TRAFI)
DK (Participant)	Vejdirektoratet
IT (Participant)	Autovie
IE (Follower)	Transport Infrastructure Ireland

NAP Highlights 2017

In 2017 many new National Access Points have been realised. Nevertheless quite a few MS still have to establish their first National Access Point.

On 21 October 2017 the new Delegated Regulation on the provision of EU-wide multimodal travel information services was adopted (2017/1926).

A new Uniform Declaration of Compliance has been agreed upon for priority action 'B', which is supported by EU EIP, TISA and the European Commission.

In May 2017 the Data Task Force was established on sharing safety related traffic data between OEM's and traffic authorities. The Data Task Force will start a Proof of Concept based on a selection of use cases on SRTI to evaluate, validate and test general principles for data sharing, access and use.

An overview of the NAPs across Europe shows that these NAPs vary largely in their scope and set up. Some NAPs build on earlier experiences of Traffic Information Centers, whereas other NAPs are created completely from scratch.

The 2017 NAP survey confirms that all implementations use DATEX II to exchange truck parking information, safety related and dynamic/real time traffic information.
